**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1 through 6 are allowed over the prior art of record. The following is an examiner's statement of reasons for allowance: Vijayan et al teaches a method and apparatus that determines how much power to allocate to each of a plurality of reverse link power control channels to be transmitted from a base station, based upon data rate control DRC and allocating power to the RLPC channel based upon receiving information provided to the base station and without having explicit information as to quality of the forward link between base station and remote.

On the other hand, the present application specifically teaches means of allocating more power to a reverse link power control channel associated with a lower quality forward link than to a reverse link power control channel associated with a higher quality forward link. This limitation in conjunction with all other limitations, has not been disclosed, taught or made obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
